PROFILE

Hello, I'm Ali Khan, a passionate and driven 17-year-old Front-end web developer. I specialize in crafting captivating user experiences using technologies like JavaScript, React.js, GSAP, and Tailwind. For me, design is not just about aesthetics —it's about solving problems and creating intuitive, user-friendly interfaces. Currently, my main focus is on building interesting and creative websites. I love coding things from scratch and bringing ideas to life in the browser. Alongside my web development work, I'm also expanding my skills by learning about cybersecurity and ethical hacking. I believe that understanding security is crucial for creating safe and robust web applications.

WORK EXPERIENCE

Front-End Web Developer

Connect and Collabs   2023-2024

- During my year at Connect and Collabs, a service-based company specializing in marketing, web design, development, and social media management, I worked as a Front-End Web Developer.
- In this role, I focused on designing and developing websites. Although the company didn't have a dedicated designer, I took on both design and development tasks. My responsibilities included:
- Creating visually appealing and user-friendly websites from scratch.
- Using technologies like JavaScript, React.js, and Tailwind to build and style web pages.
- Ensuring that all websites were responsive and optimized for different devices.
- This experience allowed me to apply my skills in a practical setting and contributed to my growth as a web developer.

Front-End Web Developer

How I Can Contribute to ViralChilly: 2024

- Innovative Design and Development: I will bring my experience in creating engaging and intuitive user interfaces to your projects. My proficiency with modern web technologies ensures that I can build high-quality, responsive websites that align with ViralChilly's vision.
- Problem Solving and Creativity: I am passionate about solving design and development challenges, which will help in delivering creative solutions for your clients' needs and enhancing user experiences.
- Collaboration and Adaptability: I thrive in collaborative environments and am eager to contribute to your team's success. My ability to handle multiple aspects of web projects, from design to coding, will complement ViralChilly's innovative approach.
- I am excited about the opportunity to apply my skills at ViralChilly and contribute to your diverse range of web design and development projects.
